

Welding table selection checklist

Compare the hole system, useful work area, supports and complete supply.

Project / reference: _____ Date: _____

Define the job

☐ Representative parts and the largest regular workpiece recorded

☐ Datums, locating points and weld access marked

☐ Weight distribution and handling method identified

Check the complete system

☐ D16 or D28 nominal hole diameter confirmed

☐ Hole grid, pin dimensions and engagement checked separately

☐ Compatibility with existing fixtures verified dimensionally

☐ Exact table model, material and surface treatment recorded

Review size & supports

☐ Room allowed for stops, clamps and operator access

☐ Overhang, extensions and separate supports reviewed

☐ Support configuration and applicable loading confirmed

☐ Working height, floor suitability and unloading access checked

Compare quotations fairly

- ☐ Table, supports, tooling and quantities itemised

- ☐ Drawing revision, tolerances and inspection method agreed

- ☐ Packing, destination and shipping responsibilities specified

- ☐ Main platform 3 years / accessories 1 year warranty reviewed

Hole diameter does not establish a load rating or accuracy. Use the agreed specifications for the exact model and complete support configuration. Warranty coverage and exclusions:
